EdSurvey 2.7 Release

- The released EdSurvey Version 2.7 added the following features:
    - The linking error method for NAEP assessments during transition year from paper-based assessment to digital-based assessment.
    - mml.sdf function that performs direct estimation of NAEP and TIMSS data by using the Dire and NAEPirtparams package.
    - Data sources:
        - PISA YAFS
        - ICCS 2016
- For the current statistical functions that EdSurvey provides, see https://www.air.org/project/nces-data-r-project-edsurvey

Institute of Education Sciences

Future Trainings and Stay Connected

- A series of EdSurvey virtual trainings in October 2021.
- Learn more about the training opportunities and new releases of the EdSurvey, register here: https://naep-research.airprojects.org/Subscribe
